EEI	The luminaire is suitable for lamps of energy efficiency classes A++ to E.
IP 44	Protection against penetration of foreign objects > 1 mm. Protection against penetration of splashing water.
	Lightings of Protection Class I in which the protection against electric shock is not based solely on isolation, but an additional safety measure contains such a way that accessible conductive parts are equipped with means for connection to the protective conductor of the fixed installation, so that in case of failure of the basic insulation exposed conductive parts cannot be active.
